Science

GOALS

Ensure the professional success of Nephrology Nurses through innovative and accessible education, addressing workforce shortages, enhancing quality care, and improving outcomes for individuals living with kidney disease.

Empower nephrology nurses to be leaders in shaping health policy and in driving improvements in patient care while advocating for the growth and recognition of the profession of nephrology nursing.

Strengthen the global presence and influence of nephrology nursing through collaboration, partnership, and professional networking.

Advance nephrology nursing by promoting scientific research, innovation, and evidence-based practices that transform kidney care and improve patient outcomes.
