

January 17, 2025

## Dear Representative,

On behalf of all the 64 member organizations comprising the <u>Nursing Community Coalition (NCC</u>), we look forward to working and collaborating with you in the 119th Congress. The NCC represents the cross section of education, practice, research, and regulation within the nursing profession. We believe that the healthcare delivery system should be one that promotes patient choice and wellness, advances research through scientific discovery, and provides timely access to care across the life continuum. With over four and a half million licensed Registered Nurses (RNs), Advanced Practice Registered Nurses (APRNs),<sup>1</sup> nurse leaders, boards of nursing, students, faculty, and researchers, the profession embodies the drive and passion to continually improve care for all patients, families, and communities.<sup>2</sup>

Nurses continue to be on the frontlines providing care in communities across the nation, driving innovation, and improving health care delivery. Continued investment in the current and future nursing workforce is imperative for these providers and patients. In the 119<sup>th</sup> Congress, you can support our nation's nurses by supporting these two priorities:

## Title VIII Nursing Workforce Development Programs: Supporting Our Current and Future Nurses

Last reauthorized in the 116<sup>th</sup> Congress, the Nursing Workforce Development Programs (Title VIII of the Public Health Service Act (42 U.S.C. 296 et seq.)) help meet the nation's demand for nursing services by addressing all aspects of nursing education, practice, recruitment, and retention. From scholarship and loan repayments, to supporting APRNs and future faculty, each program under Title VIII is unique and plays an essential role in supporting our nursing workforce.

As the largest dedicated federal funding for nurses, the Title VIII Programs have bolstered and sustained the nation's nursing pipeline and address the needs of rural and underserved communities, where nursing care is critical to improving health. Funding for Title VIII Nursing Workforce Development Programs must meet levels reflecting the nursing population it serves, as these programs connect patients with high-quality nursing care in community health centers, hospitals, long-term care facilities, local and state health departments, schools, workplaces, and patients' homes. We look forward to working with this Congress to reauthorize these programs and ensure federal funding our nursing workforce is sustained.

## National Institute of Nursing Research: Nurse Researchers and Scientists Leading the Way

As one of the 27 Institutes and Centers at the National Institutes of Health (NIH), the National Institute of Nursing Research (NINR) funds research that establishes the scientific basis for quality patient care. With a renewed purpose of addressing social determinants of health, NINR is at the forefront of disease prevention,

<sup>&</sup>lt;sup>1</sup> APRNs include certified nurse-midwives (CNMs), certified registered nurse anesthetists (CRNAs), clinical nurse specialists (CNSs) and nurse practitioners (NPs).

<sup>&</sup>lt;sup>2</sup> National Council of State Boards of Nursing. (2025). Active RN Licenses: A profile of nursing licensure in the U.S. Retrieved from: <u>https://www.ncsbn.org/nursing-regulation/national-nursing-database/licensure-statistics/active-rn-licenses.page</u>

patient care, and recovery. NINR not only provides a specialized focus of our nation's nurse researchers but has a longstanding commitment to collaboration with other Institutes, Centers, and Divisions within NIH. Further, the essential work of our nurse scientists and researchers directly impacts the education of our nursing students, supports faculty and schools of nursing, and informs best practices. Should Congress look at possible NIH reforms, we strongly encourage the retention of NINR as an independent Institute, a vision that was a cornerstone to the creation of NINR by Members of Congress on both sides of the aisle and is critical to developing new evidence-based practices to care for all patients.

In addition to the two critically important issues above, NCC also supports several other policy priorities that impact nurses and patients across the nation. From maternal health, public and population health, veteran's health, and mental health to supporting the safety and well-being of our nursing workforce and protecting them from physical violence, successfully connecting sound policy with impactful implementation is essential to ensuring an efficient health delivery system for all. It is imperative that legislation focuses on access to the entire continuum of services provided by RNs and APRNs and removes unnecessary barriers to receiving that care.

As the new Congress commences, we stand ready to support you and your staff to address these vital issues, while building long-term support for our current and future nursing workforce. Together we can ensure that our nation's nurses have the resources needed to build a stronger health care system. If the NCC can be of any assistance, please do not hesitate to contact the coalition's Executive Director, Rachel Minahan, at <u>rstevenson@thenursingcommunity.org</u>. We also invite you to view the Nursing Community Coalition's recent efforts at <u>www.thenursingcommunity.org</u>.
